

SHALOM EMMANUEL

FULL STACK DEVELOPER • AI & PROCESS AUTOMATION ENTHUSIAST

📍 Gatineau, QC, Canada
✉ emshalom23@gmail.com
🌐 github.com/EmaShalom

TECHNICAL SKILLS

📄 **LANGUAGES**
Python, JavaScript, Java, SQL,
HTML5/CSS3

🌐 **WEB & BACKEND**
React.js, Spring Boot,
Django REST Framework,
Node.js, Express.js,
REST APIs, JWT Authentication

🗄 **DATABASES**
PostgreSQL, SQL Server,
MongoDB, MySQL

🧠 **AI / ANALYTICS**
Machine Learning, NLP,
TF-IDF, Random Forest,
Cosine Similarity,
Power BI, RapidMiner

⚙ **DEVOPS & TOOLS**
Docker, Git, GitHub, VS Code,
Power Automate, SharePoint

🛡 **NETWORKING & SECURITY**
Cisco Packet Tracer, VLAN,
OSPF, SNMP, NGFW, Wireshark

OBJECTIVE

Full Stack Developer with hands-on experience designing intelligent web applications, business process optimization systems, and AI-driven solutions. Skilled in modern full stack development using React, Spring Boot, Django, PostgreSQL, SQL Server, and Machine Learning techniques.

Experienced in healthcare administration, teaching, and software engineering, with strong abilities in system architecture, API development, automation, and collaborative project delivery. Seeking opportunities to contribute to innovative teams building scalable and impactful digital solutions.

PROFESSIONAL EXPERIENCE

Administration & Office Technology Instructor

2024 – Present

CFP Vision Avenir, Gatineau, QC

- Teach office automation, accounting tools, and digital administrative workflows.
- Create structured educational content and interactive learning materials.
- Train students on modern business technologies and process optimization practices.

Administrative Agent

2020 – 2024

CISSS de l'Outaouais, Gatineau, QC

- Worked across multiple administrative and operational healthcare departments.
- Participated in information management and workflow coordination.
- Contributed to operational process improvement initiatives in hospital environments.

Tutor – IT & Office Applications

2023 – Present

Université du Québec en Outaouais, Gatineau, QC

- Assisted students with programming, databases, office applications, and technical problem solving.
- Supported academic success through personalized tutoring sessions.

EDUCATION

Bachelor of Computer Science

Expected Graduation: 2026

Université du Québec en Outaouais, Gatineau, QC

Professional Diploma – Office Administration

Bachelor's Degree in Biochemistry

2014

PORTFOLIO PROJECTS

01 HosCor — Intelligent Hospital Coordination Platform

2026 • Deployed • Full Stack • React • Spring Boot • PostgreSQL • Docker • JWT

- Developed a smart hospital coordination platform to optimize patient flow and operational communication.
- Modules: bed management, emergency coordination, admissions, transfers, hygiene tracking, dashboards, shift reporting.
- Built RESTful APIs with Spring Boot and secure authentication using JWT.
- Simulated real-time hospital workflows and centralized operational processes.
- Containerized services with Docker for scalable deployment.

02 UQO-Requests — Internal Request Management System

2026 • React • PostgreSQL • REST API • JWT • GitHub

- Built a collaborative platform for internal request submission and operational tracking.
- Implemented role-based access, dashboards, status workflows, messaging, and notifications.
- Designed SPA with React, reusable components, and protected routes.
- Integrated JWT authentication and session management.
- Used GitHub workflow with branches, pull requests, and agile practices.
- UI inspired by professional ticketing systems.

03 AI-Based Resume Screening System

2025 • Machine Learning • NLP • Python • SQL Server

- Developed an AI system to analyze and rank resumes automatically.
- Applied NLP techniques to extract skills and profile information.
- Implemented TF-IDF, cosine similarity, and Random Forest classification.
- Automated candidate ranking based on job requirements.
- Used SQL Server to manage and structure datasets.

04 Hospital Data Visualization & Process Optimization Research

2025 • Power BI • SharePoint • Automation • Process Analysis

- Designed concepts for operational dashboards and workflow automation in healthcare.
- Built visual coordination stations for bed availability, discharges, emergencies, and unit coordination.
- Explored process optimization using SharePoint, Power Automate, and Power BI.
- Focused on improving communication efficiency and operational visibility.

LANGUAGES

- French – Native
- English – Professional Working Proficiency

CERTIFICATIONS & TRAINING

- Azure Cloud – In Progress
- Cybersecurity Network Training
- CS Games – Polytechnique Montréal Participant

SOFT SKILLS

- Problem Solving
- Teamwork & Collaboration
- Communication
- Adaptability
- Leadership
- Analytical Thinking
